# UPD On-Line Crime Reporting System

The Ukiah Police Department is proud to announce the arrival of an on-line crime reporting option for our community.

This web based reporting system will allow the public to file crime reports like, theft, vehicle burglary, lost property, hit and run, crime tips and others, over the internet at your convenience.

The Department has developed this new internet based reporting system to assist the public in documenting criminal activity, utilizing a convenient on-line tool.

This new service will allow the public to file a crime report at a time that is best for them, without having to wait for an officer to respond or call back. People using the system will be able to print a temporary copy of the police report immediately to file with their insurance company, or use for other documentation needs.

The completed report will be reviewed by police personnel, and once approved; the filing person will receive an email with an approved copy of the report attached for their records.

Submitted reports, and other crime tip information, transfer electronically to the department's records system, and on-line reports will receive the same investigative and statistical analysis ability as if the report had been filed by a police officer.

This web based reporting system is designed to allow a quick and timely response for those who need to report minor incidents, and will allow officers more time to address community needs while on patrol.

This web based crime reporting service is available at www.ukiahpolice.com .
