SPEC. 21-01 DOWNTOWN STREETScape, ROAD DIET AND UTILITIES PROJECT – PHASE II

Addendum No. 1

March 27, 2023

The following is Addendum No. 1 to SPEC. NO. 21-01 Downtown Streetscape Phase 2 Project.

This Addendum is hereby made part of the Contract Documents to the same extent as though it were originally included therein.

I. The following are questions asked and corresponding responses:

Q1: Should Item #26 be LF rather than EA?

A1: Correct, Item #26: "Remove Existing Sanitary Sewer Main" unit of measurement shall be LF.

Q2: The compensation language for item 69 "Class 2 Aggregate Base" states that AB under minor concrete is paid for in this item. However, the bid item quantity seems to only include the 1.25' depth of AB in the new structural section under new roadway. Please confirm or clarify.

A2: Class 2 Aggregate Base used in construction of new flatwork and other concrete will be paid per cubic yard under item 69 which is not a Final (F) pay item. The contractor will be required to supply all material tags to City inspection upon delivery which must match all invoicing.

Q3: Is the HMA and or concrete for patch repair work paid for in each respective utility item per the compensation language or is it part of the HMA (item #70) and various concrete items?

A3: The HMA and/or concrete required to restore service utility trenches will be included in each appropriate line item work including both temporary and permanent paving for those locations outside street rehabilitation locations. For the permanent trench work as noted in call-out #11 on C-109 and C-110 on Scott Street and Norton Street, materials will be paid for from items #69 and #70.

Correction:

Sheet G-005

Structural Section "C" – The plan currently shows the new (N) structural section of AB to be 0.25'. This is a typo and the (N) AB section will be 1.25'.

All other terms and conditions remain in full force and effect.
