WEST GOBBI STREET PAVING SCHEDULED JUNE 9-13TH; URBAN CORE REHABILITATION AND TRANSPORTATION PROJECT ENTERS FINAL STAGES

Ukiah, CA. June 5th, 2025. — The Urban Core Rehabilitation and Transportation Project (UCRT), which consists of major street reconstruction and utility replacement on Main, Gobbi, and Perkins Streets, is entering its final stages. This project, largely grant-funded, will be wrapping up in the coming months.

Paving on West Gobbi Street between State Street and Dora Street is scheduled to begin June 9th. Because most of this section of the street needs to be completely reconstructed (versus just a top layer of pavement), West Gobbi Street will be completely closed to traffic Monday-Friday, June 9-13th during construction hours, 6am to 6pm. Residents will have access to their driveways before/after construction hours, but not during, and should plan to park their vehicles outside of the construction area. Dora Street and State Streets at the Gobbi intersection will remain open, however, there will be intermittent lane detours in the area as contractors work near the intersections. Please use caution while travelling through these areas and watch for pedestrians and construction workers.

East Gobbi will be paved next and is tentatively scheduled to begin the week of June 23rd, with possible night paving to reduce construction time and impacts to traffic. This section will take approximately one week, and additional information will be provided once dates have been confirmed. Prior to paving on East Gobbi, final water tie-ins will take place on East Gobbi Street near the Orchard Avenue intersection. This is being scheduled for night work on June 12th to reduce impacts to residents. Residents and businesses will be provided 72-hour advance notice of any planned utility outages.

Once East and West Gobbi Street are paved, reconstruction and paving will begin on Main Street from Norton to Gobbi. Additionally, potholing (drilling into the pavement to identify utilities) will begin on Perkins Street June 16th. Perkins Street construction will consist of adding a new eastbound lane between Orchard Avenue and Pear Tree Center driveways, some concrete work, installation of new storm drains on the north side of the road, and updated traffic signals. Most of this work will occur between the Orchard Avenue intersection and Hospital Drive. Once complete, Perkins Street will be paved.

Additional information about this project can be found on the City of Ukiah's website at <https://cityofukiah.com/ucrt/>. From the same page, people can sign up for emailed construction updates.

Construction days/hours are Monday - Friday 6AM – 6PM.

Night Work Construction Hours, currently scheduled for June 12th are 8PM to 6 AM

Shannon Riley, Deputy City Manager
